Notification Date: June 15, 2026

**Summary of 60-Day Notice: Clean Heat Beneficial Electrification Flex Budget**

Public Service Company of Colorado (the "Company") submits this 60-Day Notice to inform stakeholders and customers of its intent to utilize up to 15 percent budget flexibility authorized by the Colorado Public Utilities Commission ("Commission") in Proceeding No. 23A-0392EG. Consistent with Decisions No. C24-0397 and C24-0601, the Company may reallocate up to 15 percent of approved Clean Heat Plan budget flexibility and anticipates utilizing the authorized budget flexibility during 2026 to support beneficial electrification activities included within the Company's approved Clean Heat Plan.

A copy of this 60-Day Notice is available on the Company's website at the following link: Xcel Energy 2024-2027 Clean Heat Plan.

## A. Incremental Spend

The Company is seeing strong activity in Clean Heat programs providing rebates for heat pumps. Although pleased to see the growing momentum in the market for heat pump technology the Company recognizes that the current forecast spend for 2026 results in an expectation of needing to access the flex funds identified in the 2026 Clean Heat budget for beneficial electrification in the 3rd quarter of the year.

These dollars will be used to support bonus incentives while educating the market on the appropriate selection and use of heat pumps. In addition, we will maintain support for trade recruitment and training to deliver quality installation practices and recruit additional
